# LIVING LABORATORY FRAMEWORK

## Snapshot

This study defines what Living Laboratories are, their benefits and what they need to be successful. Living Laboratories allow collaborative research with researchers, industry, government and end-users sharing resources and information and allowing users to help test and shape innovations so that the end product is well suited to its users.

## Outcome

The study recommends how CRC can support Living Laboratories and has generated an application form for project proposals and a poster about Living Laboratories.

## Engaged Communities

### 7. Living laboratories as low carbon lifestyle narratives

#### Project Leader

Dr Stephen White (CSIRO)  
stephen.d.white@csiro.au

#### Partners

CSIRO; Curtin

**PROJECT START DATE: OCT 12**

**PROJECT DURATION: 3 MONTHS**
